Sandyford Activity Report 2016 – Renfrewshire

Introduction

Welcome to the first in an ongoing series of annual reports which draws together attendance data from people attending Sandyford. We plan for this information to be made available to contribute towards public health intelligence, specifically to

- Contribute evidence of population need
- Help measure the effectiveness of service provision
- Measure public health and health improvement impact
- Support organisation performance measurement

NaSH is the sexual health patient record system provided utilised in all specialist sexual health services in Scotland. All values less than 10 have been suppressed and are marked with an 'X' to prevent deductive disclosure. This report provides information for 2016 for Renfrewshire HSCP area. A full report for all NHSGGC is also available.

About Sandyford in 2016

Sandyford is a specialist sexual health service. It is provided on a universal basis, however it also provides a series of highly specialist thematic services for complex procedures or for particular clients. During 2016, Sandyford provided services across the NHSGGC area in the following locations.

Name of Service	Days Per week	HSCP area	Name of Service	Days Per week	HSCP area
Sandyford Central	5	Glasgow City (Northwest)	Paisley	5	Renfrewshire
Drumchapel	1	Glasgow City (Northwest)	Johnstone	1	Renfrewshire
Parkhead	4.5	Glasgow City (Northeast)	Boglestone	3	Inverclyde
Springburn	2.5	Glasgow City (Northeast)	Vale of Leven	2	West Dunbartonshire
Easterhouse	1	Glasgow City (Northeast)	Clydebank	1	West Dunbartonshire
Govanhill	3	Glasgow City (South)	Kirkintilloch	1	East Dunbartonshire
Castlemilk	1	Glasgow City (South)	Barrhead	2	East Renfrewshire
Pollok	3	Glasgow City (South)			

2016 was the first full calendar year where most services were provided a telephone appointment basis and clients are triaged to an urgent appointment (usually within 2 working days) or a standard care appointment for non urgent care.

During 2016, staffing levels affected some services and in December 2016 a series of temporary service reductions were put in place to alleviate this. This took the form of a temporary one day reduction in Barrhead, Vale of Leven, Pollok and Springburn.

In this report information is provided about procedures and service access of Renfrewshire clients at Sandyford however does not provide information about individuals who accessed aspects of sexual health care from other services such as primary care or Acute settings.

Table 1 - Sandyford Clients resident in Renfrewshire in 2016
